### Steering, Rudder and Auto Helm, etc

Date	Notes	Repairer	Price
2015	The auto helm belt slips, particularly in heavy weather. This has been an ongoing problem for many years - since 2014 at least. There are spare belts on board but they too are very old. Perhaps we should invest in a new one.	?	
30/07/18	Remounted the wooden block that supports the autohelm. Removed nuts from the bolts underside in engine bay and replace with nylox nuts.	Tom	£0.00
07/01/19	Repair to rudder	VYC	£1,424.12
22/03/21	Investigate steering issue. The wheel feels very tight. System serviced and greased. (£ not easy to calculate from VYC bill.)	VYC	?
03/04/22	Repair to rudder caused during John giving assistance to Sailing Holidays at Hotel Iris. Sailing Holidays paid for the repair.
